Ethel, LLC Announces Software Compatibility with Windows Seven

ARLINGTON, VA January 4, 2010 - Ethel, LLC, a developer of website filtering solutions such as those offered through www.problempoker.com, www.problempornography.com, and www.problempill.com, has announced it's compatibility with Microsoft's latest operating system, Windows Seven, which was widely released on October 22, 2009.

Ethel, LLC attested that its products have been fully tested under Windows Seven and works flawlessly - right from the install process to actually running the products.

Windows Seven is the latest version of Microsoft Windows, a series of operating systems produced by Microsoft for use on personal computers, including home and business desktops, laptops, net-books, tablet PCs and media center PCs.
